Introduction

About ARCH Profile

ARCH Profile offers the most comprehensive and reliable selection of online assessments available. Developed by our team of experienced psychologists and programmers, our assessments utilize Artificial Intelligence (A.I.) technologies to deliver precise scoring and in depth analysis instantaneously in a user-friendly environment.

Our tests are developed by a team of experienced developers led by Ilona Jerabek, PhD. Our technical team, directed by artificial intelligence (AI) researcher Vrat Jerabek, continuously conducts experiments and simulations to improve the AI systems that handle complicated scoring algorithms. All of the professional tests offered on Psychtests are rigorously developed and based on a thorough statistical analysis. Each test is well researched and designed according to the APA (American Psychological Association) standards for educational and psychological testing.

About Us

Psychtests.com originally appeared on the internet scene in 1997 and is a subsidiary of Plumeus Inc., a privately owned high-tech company specializing in psychological test development and related products and services. While Plumeus is responsible for research and development of high-quality products and services centered on an extensive battery of psychological assessments, Psychtests was conceived as the delivery system of those same solutions. Since its inception, Psychtests has become a pre- eminent provider of psychological assessment products and services to human resource personnel, therapists, academics, researchers and a host of other professionals around the world.
AMI - R (Assessment of Multiple Intelligences - Revised)

Vitals

No. of questions: 55
Question type: Situational, self-report
Estimated completion time: 20 minutes
Shorter versions of assessment: N/A
Recommended age level: 18+
Qualification Level: Class A
Compliance: APA standards; EEOC standards (disability, ethnicity)
Validation Information:
- Sample Size: 10,135
- Cronbach's Alpha range: 0.64 to 0.79

Features

Benchmarks: Available (general population and 26 industries)
Interview Questions: Available
Group Comparisons: Available

Report Includes:
- Summary
- Introduction
- Graphs
- Detailed narrative interpretation
- Dominant and Least Developed Intelligence Types
- Advice

Factors and Scales:

8 scales:
- **Bodily-Kinesthetic**: Ability to coordinate bodily movements and/or handle objects skillfully.
- **Logical-Mathematical**: Ability to use logical reasoning to solve a problem. Also involves number and computing skills.
- **Linguistic**: Highly developed capacity to use words effectively, in writing or in speech, as well as to persuade, remember information, and explain.
- **Visual-Spatial**: Highly developed capacity to perceive the visual world accurately and to transform, manipulate and recreate mental images.
- **Musical**: Ability to compose and perform musical patterns recognize pitches, tones, and rhythms.
- **Intrapersonal**: Ability to detect and discern among one’s own feelings (self-knowledge) and the ability to use that knowledge for personal understanding.
- **Interpersonal**: Capacity to understand and interact effectively with others. Ability to discern the moods, temperaments, dispositions, motivations, and desires of other people and respond appropriately.
- **Naturalistic**: Ability to understand and classify the natural environment, particularly vegetation and animals. Includes excellent observational skills and a strong interest in nature.

Purpose: The AMI - R, based on the work of Howard Gardner, will assess the manner in which a person learns best. It will identify which specific type of intelligence an individual possesses and how it can be used to his or her advantage.
AMP - R3 (Advanced Multidimensional Personality Matrix – 3rd Revision)

Vitals

No. of questions: 175, plus additional questions
Question type: Situational, self-report
Estimated completion time: 45 minutes
Shorter versions of assessment: Yes
Recommended age level: 18+
Qualification Level: Class A
Compliance: APA standards (disability)
Validation Information:
- Sample Size: 1690
- Cronbach’s Alpha range: 0.66 to 0.86

Features

Benchmarks: Available (general population)
Interview Questions: Available
Group Comparisons: Available

Report Includes:
- Summary
- Introduction
- Graphs
- Detailed narrative interpretation
- Strengths and Limitations
- Impression Management
- Personality Type
- Advice

Telephone Toll Free: 1-888-855-6975  
Email: sales@psychtests.com

Purpose: ART assesses inductive and deductive reasoning skills. Verbal and quantitative reasoning skills are important in business decision-making and IT analytical aptitude, among other areas.
CADVP - R (Career Advancement Profile - Revised)

Vitals

No. of questions: 46
Question type: Situational, self-report
Estimated completion time: 15 minutes
Shorter versions of assessment: N/A
Recommended age level: 18+
Qualification Level: Class A
Compliance: APA standards; EEOC standards (gender, age, disability, ethnicity)

Validation Information:
- Sample Size: 11,025
- Cronbach’s Alpha: 0.98

Features

Benchmarks: Available (general population and 25 industries)
Group Comparisons: Available

Report Includes:
- Summary
- Introduction
- Graphs
- Detailed narrative interpretation
- Strengths and Limitations
- Advice
- Impression Management

Factors and Scales:

Overall Score plus 2 factors, divided into 8 scales:

1) Healthy Motivators: Different types of motivators that drive people to succeed.
   - Growth: Desire to gain new skills and eagerness to grow.
   - Responsibility: Interest in gaining new and expanded responsibilities.
   - Leadership: Desire to take on a leadership role.

- **Compliance:** APA standards; EEOC standards (gender, age, ethnicity, disability)

**Validation Information:**
- Sample Size: 1591
- Cronbach's Alpha: 0.83

Features

- **Benchmarks:** Available (general population)
- **Interview Questions:** Available
- **Group Comparisons:** Available

**Report Includes:**
- Introduction
- IQ score, percentile score, and graph
- Detailed narrative interpretation
- Advice

**Purpose:** LIQT - R2 is designed to test logic and mathematical IQ. It will assess a person's ability to logically discern numerical patterns and to apply them to new contexts, to complete numerical computations, and to solve geometrical, mathematical and logic word problems.
LiSI - R (Listening Skills Inventory - Revised)

Vitals

No. of questions: 54  
Question type: Situational, self-report  
Estimated completion time: 15 minutes  
Shorter versions of assessment: N/A  
Recommended age level: 18+  
Qualification Level: Class A  
Compliance: APA standards; EEOC standards (gender, age, disability)

Validation Information:  
- Sample Size: 23,220  
- Cronbach's Alpha: 0.91

Features

Benchmarks: Available (general population and 33 industries)  
Interview Questions: Available  
Group Comparisons: Available

Report Includes:  
- Summary  
- Introduction  
- Graphs  
- Detailed narrative interpretation  
- Strengths and Limitations  
- Advice

Factors and Scales:

Overall Score plus 2 factors, divided into 7 scales:  
- Physical Attentiveness: Use of verbal and non-verbal language to indicate attentiveness.  
- Mental Attentiveness: Mentally "tuning-in" to a speaker, and being willing and able to offer undivided attention.  
- External Distractions: Ability to pay attention despite background noise.  
- Conversation Flow: Tendency to interrupt or otherwise disrupt conversation flow.  
- Speaker to Listener Transition: Level of comfort with being the listener rather than speaker.  
- Body Language: Use of body language to convey interest and attentiveness.  
- Internal Distractions: Ability to pay attention despite internal conflict.  
- Attention Span: Ability to pay attention to a speaker for an extended period of time.  
- Hearing a Person Out: Ability to listen with an open mind.

Purpose: LiSI - R will assess how attentive a person is to a speaker, and whether he or she is an active participant in the listening process.

APPLICATION:  
- Pre-employment  
- Training tool  
- Professional/Skills development

7 LiSI - R SCALES:  
- External Distractions  
- Conversation Flow  
- Speaker to Listener Transition  
- Body Language  
- Internal Distractions  
- Attention Span  
- Hearing a Person Out
MANSSA - R4 (Management Skills and Styles Assessment - 4th Revision)

Vitals

No. of questions: 391
Question type: Situational, self-report, skill testing
Estimated completion time: 160 minutes
Shorter versions of assessment: N/A
Recommended age level: 18+
Qualification Level: Class A
Compliance: APA standards; EEOC standards (gender, age)
Validation Information:
  • Sample Size: 900
  • Cronbach’s Alpha: 0.98

Features

Benchmarks: Available (general population and Managers)
Interview Questions: Available
Group Comparisons: Available
Report Includes:
  • Summary
  • Introduction

Qualification Level: Class A  
Compliance: APA standards  
Group Comparisons: Available

Features

This 360 feedback system consists of a self-assessment for the target and a rating survey for those who are offering their feedback (e.g. managers, direct reports, customers, and colleagues). A team report can be generated for a group of targets to assess the performance of the group as a whole.

Individual report Includes:

- Introduction
- Overall engagement score
- Breakdown of how the target was rated on each question
- Rater comments (optional)
- Advice
- Suggestions for additional learning materials

Team comparison report Includes:

- Introduction
- Overall engagement score
- Breakdown of how the team was rated on each question
- Rater comments (optional)
- Coaching tips for managers
- Suggestions for additional learning materials

Factors and Scales:

EES 360 provides an overall rating, in addition to ratings for the following competencies:

- Degree of work effort
- Willingness to take initiative
- Taking pride in accomplishments
- Motivation to excel
- Speaking up to management
- Enthusiasm
- Work Quality
- Going above and beyond the call of duty
- Drive toward self-improvement
- Willingness to accept criticism
- Level of accountability
- Drive toward career advancement
- Conduct
- Goal-orientation
- Degree of participation

Purpose: The objective of EES 360 is to obtain a snapshot of an employee’s current attitude toward their work, their job, and the organization. It offers management insight into the organizational “vibe” and brings to light job issues that they may not be aware of.
